DETAILED ACTION

1. This communication is responsive to Amendment dated 7/25/2005.
2. Claim 1 is pending for the examination; claims 2-5 are withdrawn from the consideration.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mori U.S.

Patent No. 5,559,618.

Mori discloses in figure 2 and in the abstract a retardation film having a birefringence, wherein when a first biaxial index ellipsoid having primary refractive indexes n_x , n_y and n_z is assumed, [corresponding n_x , n_y^2 , n_z^2], where the primary refractive indexes n_x , n_y and n_z in X, Y, and Z axis directions, respectively, [corresponding n_x , n_y^2 and n_z^2 direction], satisfy a relationship of $n_x \neq n_y \neq n_z$, [since the magnitude of n_x , n_y and n_z after rotating around the n_x axis satisfies $n_x > n_z > n_y$, the magnitude of n_x , n_y^2 and n_z^2 before rotating around the X axis would satisfy $n_x > n_z^2 > n_y^2$], X axis and Y axis being parallel to a film surface and a Z axis being normal to the film surface, the retardation film has primary refractive indexes n_x' , n_y' and n_z' , [corresponding n_x , n_y and n_z], of a biaxial index ellipsoid which is obtained by rotating

the first biaxial ellipsoid at an arbitrary rotational angle θ_1° , [corresponding the angle θ], about the X axis as an axis of rotation and at an arbitrary rotational angle θ_2° , [where the angle θ_2° is 0° or 360° in fig.2] about the Y axis as an axis of rotation.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Mori U.S. Patent No. 5,559,618.
